

VT720W

The waterproof VT720W is the ideal microphone for sports and fitness trainers, TV reporters and live broadcasters. A highly efficient noise-cancelling capsule ensures optimum voice quality and prevents interference from ambient noise. This also prevents feedback from loudspeakers. The headband of the VT720W is resistant to perspiration and can be optimally adapted to the shape of the user's head - for a particularly comfortable fit and secure hold. The VT70W is available with various plugs for connection to the most common wireless systems & recorders.

- Robust, waterproof (IPX-7) headset microphone for port and fitness trainers, TV reporters and live broadcasts
- Super cardioid polar pattern (directional pick-up), extremely resistant to feedback
- Bracket design for quick and easy assembly
- Can be adjusted to different sizes thanks to the adjustable elasticated band in the neck area.
- Flexible gooseneck for precise positioning of the microphone capsule
- Ring on the gooseneck ensures that the microphone capsule remains dry.
- Available with various plugs for connection to the most common wireless systems & recorders
- Operation via an XLR connection with 48V phantom power is easily possible with the optional VT1126 adapter series
- Incl. WS720W windscreen, Case4

Capsule type	Electret condenser
Watertightness	IPX-7
Polar pattern	Super cardioid
Frequency range	100Hz- 10kHz
Sensitivity	-44dB ±3dB 1V/microbar (6.3mV/Pa)
Current drain	50µA
Bias/+VDC	1.5V - 12V
Dimensions (capsule)	25mm x 10mm
Cable	Length 1.4m (55") Ø 1.5mm
Weight	50g (1.76 oz)
Connection configuration (2 & 3-wire)	
Red	+VDC
silver	Ground
Blue (white)	NF
Frequency response
